## 3-in-1 Magnetic Wireless Charger User Manual

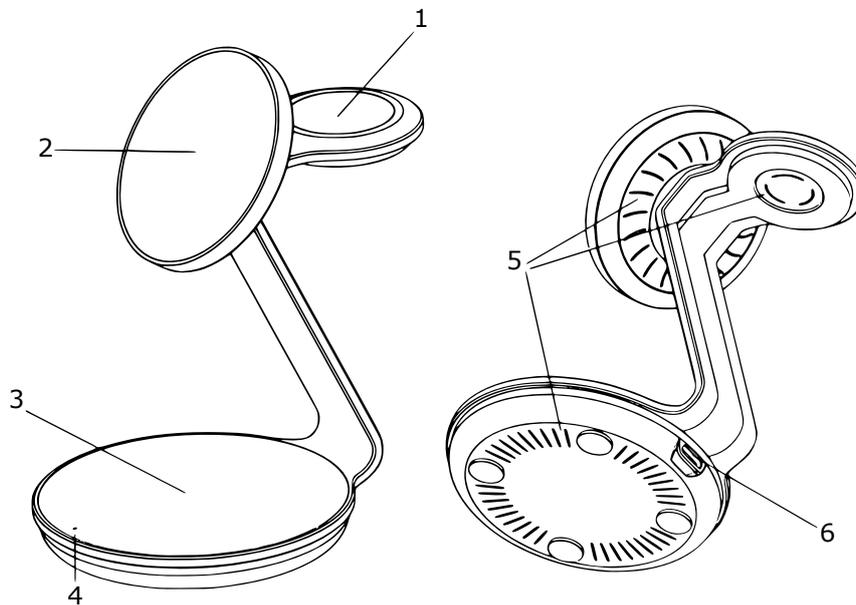

PES-047

CE FC ROHS 

Thank you for purchasing this product! This product is a 3-in-1 Magnetic Wireless Charger, compatible with iPhone 12 to 14 series with MagSafe. If you want to use a phone case, please use a MagSafe-compatible case so that the wireless charger can charge your phone better with magnet absorption. The top watch charging area is only compatible with Apple Watch, and the bottom earphone charging area is compatible with any Qi-enabled earphone charging box. We aim to provide you with a convenient, efficient, safe and enjoyable usage experience.

## I. Product Appearance

1. Watch charging area
2. Mobile phone charging area
3. Earphone charging area
4. Indicator light
5. Heat dissipation hole
6. Type-C port

## II. Product Parameters

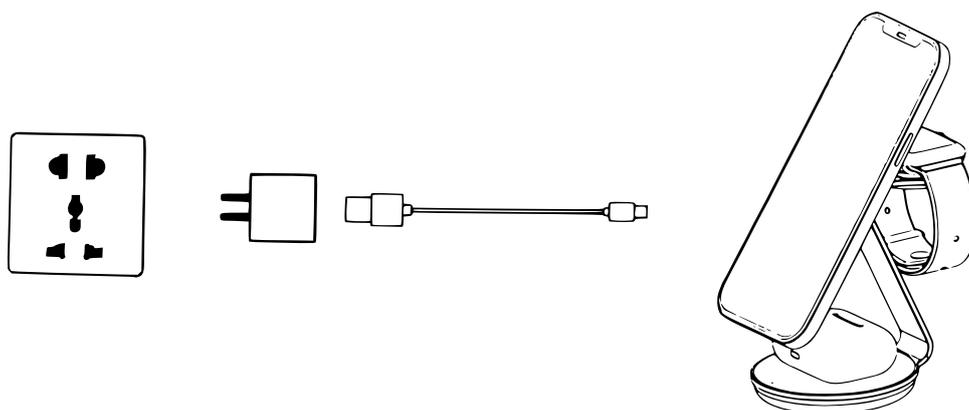

---

Product Name	3-in-1 Magnetic Wireless Charger
Model	OJD-102
Input	9 V / 2 A
Output (Watch)	3 W (max)
Output (Earphone)	3 W (max)
Output (Phone)	5 W / 7.5 W / 10 W / 15 W
Product Size	80 × 95 × 116 mm
Transmission Distance	≤ 6 mm
Conversion Rate	≥ 73 %
Color	Blue gray / Silver gray
Interface	Type-C
Standard	Qi

---

### III. Method of Application

1. Plug in the supplied Type-C cable and turn on the power.
2. Place the devices that support wireless charging in the center of the corresponding charging area and start charging.

### IV. LED Indicator

State	LED Indicator
Power on	Blue & green on for 2s, then off
Mobile phone charging	Blue light
Earphone charging	Green light
Mobile phone detects metal objects or abnormal charging	Blue light flashing
Earphones detect metal objects or abnormal charging	Green light flashing

### V. Accessory List

- 3-in-1 Magnetic Wireless Charger × 1
- Type-C Cable × 1
- User Manual × 1

### VI. Matters Needing Attention

1. Please use a qualified power adapter; otherwise it may cause unstable charging.
2. Do not place metal debris or magnetic cards on the product — this may damage the product or cause abnormal charging.

3. Please use the device as designed and follow the safety instructions; any damage caused by misuse is the user's own responsibility.

## VII. Safety Instructions

1. Do not pull the power cord hard, to avoid it breaking or disconnecting.
2. Do not disassemble the product or put it into fire or water, to avoid short circuit and leakage.
3. Do not use the product in severely high temperature, humid or corrosive environments, to avoid circuit damage and leakage.

## VIII. FAQ

### **Q1. The phone does not charge.**

A: The phone is not aimed at the charging sensing area, or the receiving coil is not installed correctly.

### **Q2. Charging fever.**

A: It is normal for the receiving coil or transmitter to generate heat during wireless charging.

### **Q3. Mobile phone charging intermittently.**

A: The charging current of the power adapter is insufficient or the voltage is unstable — please use a qualified adapter. Alternatively, the charging position may be too biased so that electromagnetic induction is not in place; adjust the charging position.

### **Q4. Slow charging.**

A: The wireless charging current allowed by the mobile phone or external receiving coil may differ, or the standby power consumption of the phone is large during charging. It is recommended to close background apps to reduce standby power consumption.

### **Q5. Other questions.**

A: Please contact after-sales customer service directly.

## **Warning**

- Do not place metal objects or magnetic cards on the charging pad — this may damage the product or cause abnormal charging.
- Use only a qualified 9 V/2 A power adapter to ensure safe and stable charging.
- Keep the product away from water, fire, and extreme temperatures.

- Do not disassemble the product. If damaged or malfunctioning, stop use and contact after-sales service.
- Slight warming of the device during charging is normal. If the device overheats, stop charging immediately.
